## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election of group II (claims 13-21) in the reply filed on 04/03/2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 13, 16 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Tao et al. (US 6,023,100).

4. Regarding claim 13, Tao shows a method comprising forming a metal region (interconnect, e.g. fig. 2c) above the substrate (i.e. semiconductor integrated circuit, col.1/lis. 15-20) the metal region comprising a first surface portion and a second surface portion opposite to the first surface portion; forming a cap layer 16a on the first surface portion; and implanting a diffusion rate reducing material into the metal region (e.g. table I).

5. Regarding claim 16, Tao shows that the metal region comprises copper (abstract).

Art Unit: 2826

6. Regarding claim 17, Tao shows a second cap layer 16a on the cap layer after implantation of the diffusion rate reducing material.

***Allowable Subject Matter***

7. Claims 14, 15, 18-21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
